

Excite your Trainees with SafetyPoints® Safety Games

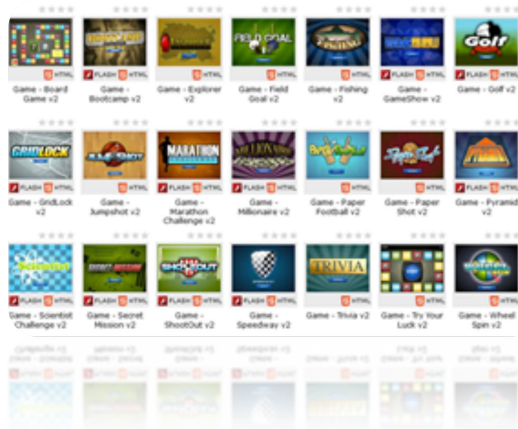

50+ Games

The Safety Arcade is a library of fun, mobile-ready, casual games covering safety topics that can be rapidly deployed to reinforce training and improve learning outcomes. No programming skills are necessary. Use our games and use them to share online, use in your favorite eLearning authoring tool or deliver in a Learning Management System (LMS).

The games can be used for stand-alone playback (1), playback on multiple CPUs on your network (2) or online placed on your server (3).

Network and online playback is accomplished by copying the Games Folder from the USB to a location (path for network | URL address on server) and linking to the index.html in each game title folder. You can also create a MENU page with the game name which links to that game index.html file for group organization for playback.

This can be accomplish with MS Word, PowerPoint or any software tool allowing hyperlinks.

SafetyPoints® PowerPoint Training Presentations for Classroom or Online Course Development

185+ SafetyPoints® PROFESSIONAL PowerPoints

The SafetyPoints® HSE CORE 185+ are editable course PowerPoints® to make training company and work specific... *For classroom training or online course development.*

PowerPoint Safety Training

The Safety Training presentations are a tool that you use to do the actual employee training. It comes in an easy to use and fully editable PowerPoint® Program. Having an in house program provides the employer with greater flexibility and saves money.

Over 30 Years Experience!

Our writers have been designing OSHA compliant safety software and programs since 1988. Our technical writing team is led by the Mr. Troy Hackworth who has pioneered many of safety programs currently on the market. Mr. Hackworth and the technical team have authored more than 500+ training programs relating to safety health, DOT and environmental topics along with custom programs for many Fortune 500 firms. **These programs are of High Quality** and the same used for the development of online training **used to train 10s of thousands of students for firms worldwide.** Our team has developed corporate safety programs for nearly the entire spectrum of OSHA compliance.

SafetyPoints® Safety Briefs® Micro-Learning Training Presentations

50+ SafetyBriefs® Micro Learning Presentations

Micro-learning content is delivered in small, easily digested “bites” designed to increase learner retention, engagement and performance. Success depends on how it’s integrated into the overall learning strategy.

Most L&D professionals agree that micro-learning — when done right — provides quicker access to learning, significantly increases retention and engagement, and improves overall workplace performance. Most of all, it enables employees in new roles to become productive on the job sooner.

Recent research shows that 41% of organizations have micro-learning as a training priority and only 19% understand that the design and development of micro-learning is key to success.

A best practice is to not use micro-learning as a stand-alone learning vehicle, but rather as a supplemental component to reinforce critical pieces of information. Micro-learning requires thoughtfulness in how it’s strategically integrated to ensure success.

SafetyPoints® EXTRAs

Extras

Extras are tools, documents, forms and safety PowerPoints which may be of assistance in your safety program development, implementation and documentation.

A Safety Program Manual (IIPP in California) designed to meet the audit requirements of **ISN, Avetta, or BROWZ.** The manual includes all the Safety Sections required by the Audit Company plus safety documentation forms.

A 1600 plus pages safety manual/IIPP in MS Word for a contractor subject to safety program audits by ISN, Avetta or BROWZ. The manual includes all of the Safety Sections required by the Auditing Company.

The Extras materials are designed to assist you to develop your safety program from scratch or improve the program you have...
