

## ROI – Return on Investment

*What would the dollar cost to develop all of these programs?*

### Professional Development

**Level I - Basic Presentation with Quizzes.** These course are the simplest level of courseware development in that Level I lessons are linear (one idea after another), and are used primarily for introducing an idea or concept (Awareness training). There is little interaction, other than the student touching the screen or using a keystroke or mouse click to continue. The media used are primarily text and graphics (not complex-using PowerPoint tool). These also serve as the core content for conversion to higher levels of development (Level II,III) using tools such as Articulate 360, ISpring, Lectora, Captivate, Camtasia etc. Estimated Average Cost per Hour Of Instruction: \$1,900.00 to \$2,170.00\*.

*Plus the time cost!*

**Being conservative and giving a development cost of \$1,000.00 each; the price to develop the entire package would be in excess of \$200,000.00! Your cost with unlimited in-house use license -\$1,899.00 plus S&H.**

**Go to [www.safetypoints.xyz](http://www.safetypoints.xyz) for samples, ordering or additional information.**

## YES---We Have Web Based HSE eLearning!

**Turn-Key HSE Cloud-SaaS Service Starts at \$5.75 per Trainee per month  
Includes Learning Management System (LMS), 400+ Courses. Free Setup /  
Support & much more!**

With CDP's Safeworkday SafetyPoints Training Software as a Service (T-SaaS), you can afford to train; **a Department, a Division or an entire company** from the Cloud. Benefits includes a low cost, [90.8% Cost Savings! ] zero infrastructure, and scalability from small teams to thousands of simultaneous users. Online Delivery / Tracking / Reporting Software and 400+ Modules provided, complete training reports with excel download with multiple sort fields | Exception report for trainee completed / incomplete training. Course editing available for company and site specific content.

**Pay-As-You-Train [www.online-safety.training](http://www.online-safety.training)**

**Training for Small firms and Individuals for \$5 per course or less!**

Small Contractors & individuals are increasingly being used in the workplace to perform multiple tasks in many industries. There are many risks associated with contractors who work in unfamiliar workplaces and the potential hazards they may encounter or even create place a heavy burden on the host employer. This Training site allows for the training of contractor employees required by multiple Operators / Host Employers as well as OSHA regulations and common safe procedures as they relate to contractors...at an affordable price. **Includes:** ISNetworld | PIC Bundle - Training for TRAV Operator Requirements Courses | 196 HSE & Security Courses plus FREE Owner Host Employer Contractor Training Courses & much more.

SafetyPoints®  
 online safety training

*From the Desk of the Developer...*

Let me introduce myself, my name is Troy Hackworth and for 35 years I have been developing safety training for classroom, online and custom needs. Why safety?

In the 1970's, I was crippled in a mining accident. My job training for the job consisted of 45 minutes of instructions on how to drive a TEREX rock truck fully loaded up and down a mountain. The training was inadequate and now, I am paying the consequences for the rest of his life. I understand that an injured employee and his employer are not the only ones affected by an incident. Entire families are affected, many times for generations. That's why we are making training tools available (*and affordable*) for anyone to assist in preventing injuries at work or home.

This product is put together to give you all you need to develop your safety program with an added twist, the ability to use the product for the classroom and/or online course development. Take the courses and make your own with pictures, added work and site specific content... for your firm or any client.

It's simple, when it comes to safety, we want everyone to be trained; No Excuses, No Bull. We focus our efforts in creating effective affordable and accessible solutions so that everyone can be trained, *minimizing the cost with a proven ROI*, the resources needed, and train 24/7, anytime and place.

Thanks for helping to be safe...

Sincerely,

*Troy Hackworth*

## 200+ SafetyPoints® PowerPoints -PROFESSIONAL

The SafetyPoints® HSE CORE 200+ are editable PowerPoints® for you to make company and work specific training... for the classroom training or online course development for your employee. It comes in an easy to edit PowerPoint® training programs with quizzes in Word plus documentation. Using these for your in house program provides you with greater training flexibility- saving time and money. **These High Quality professionally built programs are the same used worldwide by multiple firms and includes...**

### Hazard Awareness-14 Module

Helps trainees become hazard aware for specific tasks.

### HazWoper 8 HR-10 Modules

Bring your 8 HR program in-house

### Hydrogen Sulfide

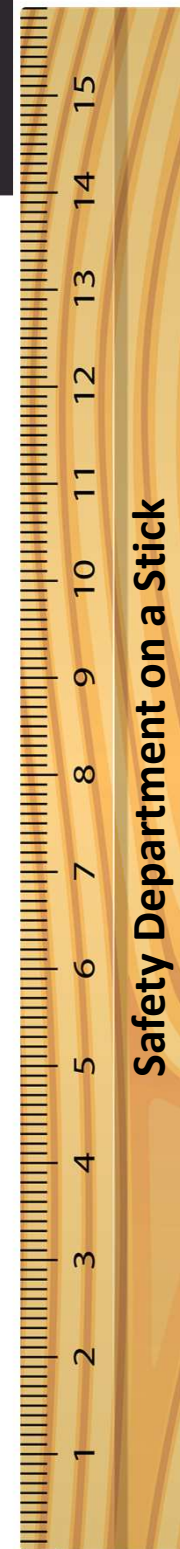

Use as prep for certification training. OSHA 29 CFR 1910 and 1926, ANSI Z390.1

### RigPass | Safeland-14 Modules

Same program used by multiple firms to achieve accreditation through the IADC for In-House RigPass and/or Safeland USA program. Includes KEANE, Patterson UTI, Lofton Staffing-Energy, CJ Energy and many more. Use to get started or update your current RP/SL program. Most recent accreditation July 2018.

### OSHA 10 HR | Security & 100s More

More than 100 additional programs based on client need and requests covering topics to fill compliance and operator required training.

## 90+ SafetyPoints® Safety Games

The Safety Arcade is a library of fun, mobile-ready, casual games ice-breakers covering safety topics that can be rapidly deployed to reinforce training and improve learning outcomes. No programming skills are necessary. Use our games and use them to share online, use in your favorite eLearning authoring tool or deliver in a Learning Management System (LMS).

The games can be used for stand-alone playback (1), playback on multiple CPUs on your network (2) or online placed on your server (3).

Network and online playback is accomplished by copying the Games Folder from the USB to a location (path for network | URL address on server) and linking to the index.html in each game title folder. You can also create a MENU page with the game name which links to that game index.html file for group organization for playback.

**NOW - 100+ Free Safety Videos Included!**

## 50+ SafetyBriefs®

Micro-learning content is delivered in small, easily digested “bites” designed to increase learner retention, engagement and performance. Success depends on how it’s integrated into the overall learning strategy.

Most L&D professionals agree that micro-learning — when done right — provides quicker access to learning, significantly increases retention and engagement, and improves overall workplace performance. Most of all, it enables employees in new roles to become productive on the job sooner.

Recent research shows that 41% of organizations have micro-learning as a training priority and only 19% understand that the design and development of micro-learning is key to success.

A best practice is to not use micro-learning as a stand-alone learning vehicle, but rather as a supplemental component to reinforce critical pieces of information. Micro-learning requires thoughtfulness in how it’s strategically integrated to ensure success.

### Acquiring Accreditation or Use for Your Accredited Training

**Outreach Training Program (OSHA 10-Hour & 30-Hour Course) Get Trained or Become a Trainer -** The OSHA Outreach Training Program provides workers with basic and more advanced training about common safety and health hazards on the job. Students receive an OSHA 10-hour or 30-hour course completion card at the end of the training.

<https://www.osha.gov/dte/outreach/index.html>

**Become a PEC instructor -** PEC Safety is the world leader in safety orientations for industry. As a PEC Authorized Trainer, you will have access to the most requested and well-respected training in the business. Since 1993, PEC Safety has been synonymous with excellence in standardized training programs designed to keep workers safe.

<http://www.pecsafety.com/become-an-instructor.html>

**IADC Accreditation -** For 25 years, IADC’s accreditation programs have helped guide companies in their efforts to ensure quality and consistency of training content and adherence to relevant industry standards. IADC’s RigPass® program (including SafeLandUSA and SafeGulf endorsements) is an accreditation system delivering a standardized safety orientation program for new employees, preparing the employees for almost any operating environment, at almost any site, onshore or offshore.
