Online Safety Training for Less Than \$12 per Employee per Year!

Maximize Training & Learning Management System (LMS) Use

In more than 15 years of developing and providing Video, PowerPoints, Computer and Online training programs...we realized we could not develop every program you need exactly as you want...So...

We ask our clients what they required in a safety training system which would be their "Ideal Training System".

The request- "A system delivered in multiple training formats, simple to edit and use at an affordable price."

Our Answer... The Adaptive Training System which includes Instructor Led, CBT Style and WEB Based Content delivered online via the Internet.

Result... You adapt the training to your training needs and you will never purchase another training course again!

Firms Which Utilize the Adaptive Training System

"The system has given us the ability to be in control. We use all the platforms for no excuses for not training."

Hector Cavazos-Senior Safety Specialist

"The system has allowed us to meet our site specific training needs-globally."

Dennis Hammonds-QHSE

"After using the system for more than 5 years we have found it to meet our training requirements with the flexibility to change as our training needs change."

Dennis Bonner-HSE Director

Each Client has their own "Unique Company Branded" Site with all the courses, Unlimited Training and more.

How?

First, by leveraging the FREE, Open Source Moodle LMS (which we modified for compliance and regulatory training), we have only time and materials invested in the Internet Training, Testing and Tracking Delivery mechanism.

Second, our course development was funded by clients just like you for their internal use which we retained the use rights, so our course development costs are covered.

In this way we pass through to you our huge investment reduction and you can deliver high quality Safety & Health training to your employees for the best price available, *Guaranteed!*
